Tokyo Metro Signs Memorandum of Understanding on Training with FEATI University in the Republic of the Philippines

Tokyo Metro Co., Ltd. (Head Office: Taito Ward, Tokyo; President: Akiyoshi Yamamura; hereinafter referred to as "Tokyo Metro") **signed a Memorandum of Understanding on Training with FEATI University in the Republic of the Philippines on Monday, April 14,** with the aim of contributing to the development of railway human resources in the Philippines by utilizing Tokyo Metro's expertise and experience in railway operations.

FEATI University has faculties of Engineering, Maritime Education, Management, and Architecture, and recently launched a Railway Engineering course within its Faculty of Engineering. Meanwhile, Tokyo Metro has been offering its expertise and experience in railway operations to railway officials around the world through its "Tokyo Metro Academy," which provides both online courses and in-person training programs in Tokyo.

The relationship between Tokyo Metro and FEATI University began in February 2020, when Tokyo Metro donated Marunouchi Line Series 02 rolling stock to the university as educational materials. Since then, their collaboration has deepened through the university's ongoing participation in Tokyo Metro Academy.

To further strengthen this relationship, both parties have now signed a Memorandum of Understanding on Training.

This agreement will allow Tokyo Metro **to provide technical support** to FEATI University by incorporating its expertise and experience in railway operations into the university's educational activities. Additionally, by offering training programs, Tokyo Metro **aims to contribute to the development of local railway professionals in the Philippines, where the railway network is expanding, and also enhance recognition of Tokyo Metro among railway stakeholders in other countries, supporting the company's future global business development.**

Going forward, the two parties will collaborate and examine the implementation of the following three areas of cooperation:

- **Technical cooperation and collaboration:**

Tokyo Metro will provide technical support and consulting services for FEATI University's educational activities.

- **Tokyo Metro Academy:**

Tokyo Metro will provide preferential services to FEATI University as a loyal customer of Tokyo Metro Academy's online courses and in-person training programs in Tokyo. (e.g., customized training programs, etc.)

- **Public relations activities:**

Both parties will share updates on their cooperation and collaboration through social media and other channels.

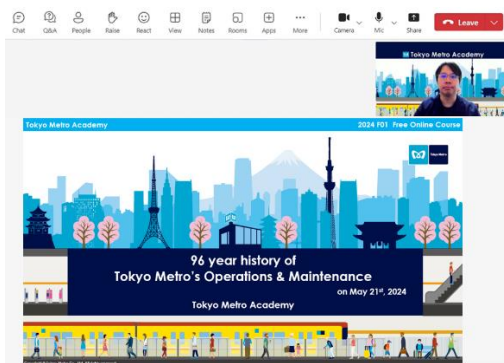

Memorandum of Understanding signing ceremony at Tokyo Metro Head Office

Tokyo Metro Academy

Tokyo Metro Academy, “Online courses” and “Training in Tokyo” for railway officials worldwide, introduces Tokyo Metro’s expertise and experience in railway operations that Tokyo Metro has cultivated to date to achieve safe and stable transport on urban railways.

A total of 433 people from 22 countries participated in Online courses (18 courses) and Training in Tokyo (3 trainings) from FY2021 to FY2024, showing a high level of interest in Tokyo Metro Academy. This initiative received a special award at the 22nd Japan Railway Awards.

We will continue to hold courses at the Tokyo Metro Academy to meet the various needs of railway officials worldwide and contribute to the sustainable development of cities around the world by supporting the development of local transportation services.

About FEATI University

Founded in 1946 as a specialized university in aeronautical engineering (training pilots and mechanics), FEATI University has since expanded to include departments in maritime engineering (training seafarers), management, and architecture, focusing on vocational and technical education.

The university has produced graduates who work in the railway sector for companies such as The Light Rail Manila Corporation and other railway operators in the Philippines.

In recent years the university is also known for launching its Railway Engineering course.
