

Tokyo Metro Ginza Line Business Area Station Design Competition 東京メトロ 銀座線ビジネスエリア 駅デザインコンペ

Environmental Design
Enjoy Seasonal Change Everywhere Every Season

Environmental Friendly Concept

The Tunnel and Air Change and Ventilation would cause uncomfortable for passengers using during winter time.

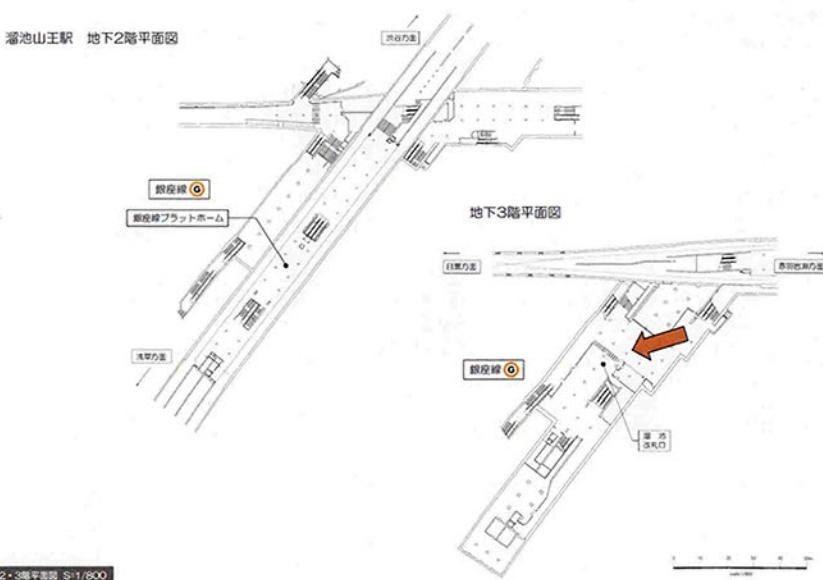

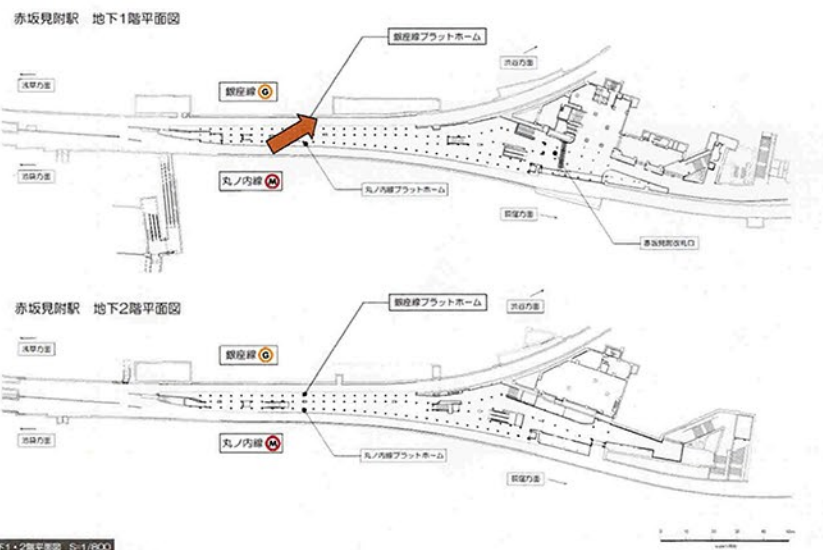

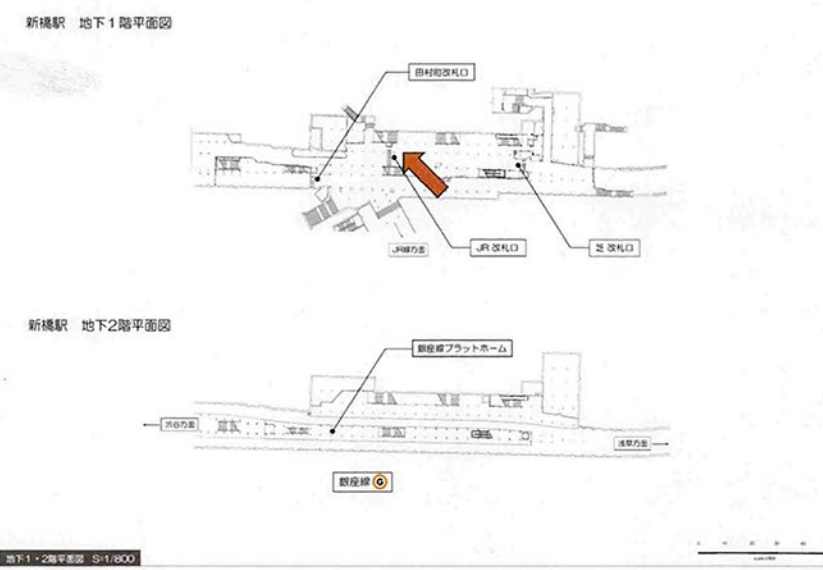

Additionally, the design consideration for positive wind pressure at underground platform to concourse area could be considered as major change more comfortable.

In winter, cold air movement will cause unpleasant human comfort feeling to Wind outside a train station has lead extremely cold air inside.

Thus, Positive pressure inside platform with warmer air to against outside cold air movement for passengers walking through building platform, remaining platform with positive wind pressure may be a good solution.

Area Design

Shinjuku Station 新橋駅

shinjuku fashion and food for gathering with friends

Akasaka Mitsuke Station 赤坂見附駅
